

I have been notified that the FCC is deciding whether or not to use LPFM's as a priority over current FM translator services. I would like to STRONGLY plead that you do not use LPFM's versus the current FM translator services, for the following reason: K-LOVE, a Christian radio station, is currently being broadcast nationwide. K-LOVE is the ONLY Christian radio station that provides encouraging, positive Christian listening, without commercial interruptions. K-LOVE has helped me to maintain a close relationship with God, as well as to provide a safe-haven for my family. I can feel confident leaving the radio tuned to K-LOVE when my three small children are listening with me. Without K-LOVE, I do not have any other options, except to listen to Christian "talk radio" or another Christian station that is not heard clearly due to bad reception. K-LOVE has been a personal tool that I have used in helping my friends in my community, who may be struggling with their faith. I know for a fact that many people who may have never been in touch with God, have had the opportunity to do so because of K-LOVE radio. I believe the service provided by K-LOVE radio is ESSENTIAL in my community, seeing that there are no other alternatives, nor any other local radio station that even comes CLOSE to the service and ministry that K-LOVE provides. I beg you with all my heart to please, give this Christian woman the blessing of allowing me to have one safe-haven in this world. I certainly won't get it on television, so the radio is my only other public outlet. Thank you for your consideration.
